

## **For all of us.**

There are people who dedicate their lives to protecting all of us.  
They are everyday heroes, who always have our backs.  
And who put their bodies, their lives and their all, on the line.  
For all of us.

For our guardian angels, their greatest armour is their health.  
Through every long shift, every emergency, every confrontation and every win.  
Then again, through the next day, the next shift, and the next emergency.  
For the good, the right and the safe.  
For all of us.

For these dedicated workers, wellbeing is a *must*.  
Not a fad or a phase, or to turn to only when the worst happens.  
Here are unquestionably committed professionals who will always need and  
completely deserve unique healthcare.  
For themselves.  
For all of us.

We exist, solely, for them.  
We are the guardians of their ongoing wellness, strength and prosperity.  
We are their embrace of support, ongoing care and absolute honesty.  
We champion those who live by *doing the right thing*.  
When we help our society's warriors stand, empowered... our community is safer.

**We are all for them.**  
**Because they are for all for us.**
